1. Power BI is composed of which of the following components?

1 / 1 point

Select all options that apply.

☒ An online Software as a Service (SaaS) service

✔ Correct

Power BI consists of a Microsoft Windows desktop application called Power BI Desktop, an online SaaS (Software as a Service) service called the Power BI service, and mobile Power BI apps.

☐ An online Platform-as a Service (PaaS) service

☒ Mobile Power BI apps

✔ Correct

Power BI consists of a Microsoft Windows desktop application called Power BI Desktop, an online SaaS (Software as a Service) service called the Power BI service, and mobile Power BI apps.

☒ A Microsoft Windows desktop application

✔ Correct

Power BI consists of a Microsoft Windows desktop application called Power BI Desktop, an online SaaS (Software as a Service) service called the Power BI service, and mobile Power BI apps.

2. You can download Power BI Desktop from the web or as an app from the Microsoft Store. However, there is a difference between how the Power BI Desktop and app are maintained. Which of the following statements is correct?

1 / 1 point

☐ Windows Store App must be manually updated periodically while a download from the web will automatically stay updated.

☒ Windows Store App will automatically stay updated while a download from the web must be manually updated periodically.

✔ Correct

You can download Power BI Desktop from the web or as an app from the Microsoft Store on the Windows tab. A Windows Store App will automatically stay updated while a download from the web must be manually updated periodically.

3. True or False?

1 / 1 point

A single dataset that Power BI uses to create its visualizations can be data extracted from multiple sources. For example, it could be extracted from database fields, a website table, an Excel table, and some online results of an email campaign.

☒ True

☐ False

✔ Correct

You can create a dataset from multiple database fields, a website table, an Excel table, and online results of an email marketing campaign. That unique combination is still considered a single dataset, even though it was pulled together from many different sources.

4. When connecting to a data source in Power BI the canvas shows the available sources of data in the Power BI service. In addition to common data sources like Microsoft Excel files, databases, or Microsoft Azure data, Power BI can just as easily connect to a wide range of cloud services such as Salesforce, Facebook, and Google Analytics.

1 / 1 point

This connection feature is available through which type of cloud service?

☐ PaaS providers

☐ IaaS providers

☒ SaaS providers

Correct

Power BI can connect to a range of software services (also called SaaS providers or cloud services) including Salesforce, Facebook, Google Analytics, and more.

5. Which of the following is the common flow of activity that would generally be carried out to create reports or visualizations in Power BI?

1 / 1 point

- ☐ Create a report in the Power BI service, share it to Power BI mobile, interact with it in Power BI Desktop.
- ☐ Create a report in Power BI mobile, share it to the Power BI Desktop, view and interact with the report in the Power BI service.
- ☐ Bring data into Power BI mobile, create a report, then share it to Power BI Desktop.
- ☒ Bring data into Power BI Desktop and create a report, share it to the Power BI service, view and interact with reports and dashboards in the service and Power BI mobile.

Correct

The Power BI service lets you view and interact with reports and dashboards however you cannot shape the data.

6. Using connections to different providers you can gain access to collections of ready-made visuals, pre-arranged in dashboards and reports. What are these ready-made visuals known as in Power BI?

1 / 1 point

- ☐ Scheduled refresh.
- ☒ App.
- ☐ Canvas.

Correct

An app is a collection of ready-made visuals, pre-arranged in dashboards and reports. You can get apps that connect to many online services from the AppSource.
